

Assignment 2 - Worksheet

Social Media and Network Analysis (COSC 2671)

Postgraduate Group 33

Lokesh Digamber Suroshe (s4160817) | Yash Devidas Kadam (s4138198)

1. Project Plan

Aim

Analyse the public r/melbourne subreddit to find the dominant local topics, how sentiment varies by topic and suburb, and who is central or bridges the reply network.

Roles

Member	Responsibility	Backup
Lokesh	Network, centrality, communities (Part A)	NLP
Yash	Topics, sentiment, suburbs (Part B)	Report

Communication

- Met twice weekly online; coordinated over group chat.

Weekly Timesheets

Lokesh Digamber Suroshe (s4160817)

Week	Tasks	Hours	Notes
Week 8	Team setup, topic chosen, repo created. Tried Reddit API, switched to ConvoKit.	5	API too slow
Week 9	Loaded corpus, preprocessing, conversation sampling.	7	
Week 10	Built reply network; in-degree, betweenness, PageRank; Louvain.	10	Fixed edge bug
Week 11	NMI/ARI, network + heatmap figures, wrote Part A.	8	
Total		30 hrs	

3. Self-Reflections

I worked on the network side building the reply graph and the centrality and community analysis. My first version of the network was a mess because I was dropping too many edges, and it took me a while to figure out it was the sampling. Once I fixed that it came together. The part I found hard was actually explaining what the centrality numbers meant instead of just listing the top users. If I did it again I'd sort out the network setup earlier so I had more time for the analysis.
