

Assignment 2 - Worksheet

Social Media and Network Analysis (COSC 2671)

Postgraduate Group 33

Lokesh Digamber Suroshe (s4160817) | Yash Devidas Kadam (s4138198)

1. Project Plan

Aim

Analyse the public r/melbourne subreddit to find the dominant local topics, how sentiment varies by topic and suburb, and who is central or bridges the reply network.

Roles

Member	Responsibility	Backup
Lokesh	Network, centrality, communities (Part A)	NLP
Yash	Topics, sentiment, suburbs (Part B)	Report

Communication

- Met twice weekly online; coordinated over group chat.

Weekly Timesheets

Yash Devidas Kadam (s4138198)

Week	Tasks	Hours	Notes
Week 8	Scoped research questions; researched LDA/sentiment; proposal.	4	
Week 9	Text cleaning, first LDA runs.	6	
Week 10	Labelled topics, VADER sentiment, suburb extraction.	9	Tuned topic count
Week 11	Topic/sentiment/suburb figures, wrote Part B, proofread.	10	
Total		29 hrs	

3. Self-Reflections

I handled the text side topic modelling, sentiment and the suburb stuff. Getting the eight topics to actually make sense took a few goes of changing the topic number and re-reading the keywords. The suburb matching was annoying because words like "richmond" kept getting picked up wrongly, so I added a minimum mention cutoff which helped. I'd like to have tried a better sentiment model for sarcasm but ran out of time. Working in two clear halves made it easy to split the work with Lokesh.
